**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 7, 8, 9, 10, 11, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Falla, US Patent 4122947.
3. Falla teaches a pre-packaged patient identification kit including an animal identification device (wristband 23 and label with indicia 26, 27, and 36) adapted for application to an animal (human) and a device for secure storage of organic material (container 38) taken from the animal to be identified by the identification device, the storage device and identification device each being marked with a common identifier 26, 27, and 36 and a storage holder (package 21) in which the identification device and the storage device are mounted prior to use.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 3-16, 18, 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brem, US 6509187 in view of Falla.

6. Brem teaches a system for identification of animals comprising an animal identification device (10, 11 ) adapted for application to an animal and a device (1,9) for secure storage of organic material taken from the animal to be identified by the identification device. Both the storage device and identification device are marked with a common identifier. See column 3, lines 6-40..

7. It would have been obvious to one having ordinary skill in the art the time this invention was made to store the animal identification and storage device taught by Brem with a package as taught by Falla to provide means wherein all the necessary items are available within one package to identifying an animal.

#### ***Response to Arguments***

8. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3611

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
